Well Mixed.

A young bride asked her hubby to copy a radio recipe. This is what he took down. He did the best he could but got two stations at once—one of which was broadcasting physical culture exercises and the other the recipe:

Hands on hips, place one cup of flour on the shoulders, raise knees and depress toes and mix thoroughly in half a cup of milk. Repeat six times. Inhale quickly one-half tea spoon of baking powder, lower the legs and mash two hard-boiled eggs in a sieve. Exhale, breathe naturally and sit in a bowl. ATTENTION! lie flat on the floor and roll the white of an egg until it comes to a boil. In ten minutes remove from the fire and rub anointly with a rough towel. Breathe naturally and dress in warm flannels. Serve with fish sauce.

LOCAL NEWS.

Mr I Umbach was up from Leduc over the week-end.

Mr Louie Bredo, carpenter, who has resided north of town for the past year, has gone to Lamont, where he has secured a position, in a lumber yard.

The thirteenth "Rally Day" Sunday School service of the United Church was held Sunday evening last, Sept. 25th. Special hymns and readings by the pupils were given. A large number were present.

The fairly good weather at the opening of the duck-hunting season, last week, enabled the local shooters to get some good bags of the feathered beauties. The ducks are more plentiful this season than at any time since the opening season was changed from Sept. 1st to Sept. 15. This is said to be due to the excessive rains this season, which has filled the sloughs, and also to the good feeding which the excellent crops all over the northern part of the province has given the birds.

M. M. Mecklenburg, the well-known optical specialist, will be at the Royal Hotel, Stony Plain, on Thursday, October 6th. See him and see well.

Found, auto number plate. Apply Sun Office.

New Engine for Lighting Plant

The new Petters engine for the local electric lighting plant has arrived. This is a 40 horse power oil burner, like the one it replaces.

A new house for its accommodation had been erected on a lot opposite the Armbruster mill, where the old plant is located.

A place has been reserved in the new house for an auxiliary engine, probably a 28 h.p., which it is intended to install later.

The fact that it is proposed to supply power to the four local elevators during the year, necessitating all-day power, will come as a boon to those local consumers who have been handicapped by the stoppage of the power and light at daybreak.

Meeting of Inga Councillors.

Inga Councillors met in Stony Plain on Friday last, Sept. 28th, with all the Councillors present and Reeve M. McKinlay in the chair.

Mr Wilson, a former Government road contractor but now of Duffield, was present and gave a short address to the Councillors.

Mr D McDonald, pound-keeper in Div. 2, was present in connection with the matter of some stock taken to his pound from Div. 1. After some discussion, this matter was settled amicably.

A number of accounts in connection with work on the roads were passed and ordered to be paid, if found correct.

RED ROSE PEKOE "is good tea"

RED ROSE ORANGE PEKOE is the "best tea you can buy"—picked when only three days old—juicy, flavor-filled leaves. Now packed in Aluminum.

General Outlook Is Encouraging

The latest preliminary estimate of the yields of the principal grain crops, issued by the Canadian Government Bureau of Statistics, based upon reports from all parts of the Dominion, predicts a wheat crop of 458,741,000 for this year, the second largest crop ever grown in Canada. The record crop was in 1923, which totalled 474,199,000 bushels. This year's wheat crop is estimated at 48,930,000 bushels more than last year's yield and promises an average yield per acre of 20.4 bushels per acre.

The three great grain growing provinces of Canada, Manitoba, Saskatchewan and Alberta, will produce 423,233,000 bushels of this year's total crop of wheat as compared with 332,440,000 bushels in 1925. There has been considerable damage from rust this year in various sections of Saskatchewan and Manitoba and when that threatening return is in, the government's estimate may be considerably lowered. The Manitoba Free Press estimates the wheat crop of the three prairie provinces for the year 1927 at 454,121,125, which is some eight million bushels less than the government estimate. This paper's estimate of the Oct.-crop of the three prairie provinces is also considerably lower than that of the government and in the final analysis may prove to be more nearly correct, as with the exception of Alberta and the western part of Saskatchewan, the oat crop has been rather disappointing. Rust and frost has caused a lot of damage. However, there can be no question but that this year's crop throughout the west will be well above the average.

A new high record of wheat production has been established in Alberta this season with a crop now estimated at 158,862,000 bushels, an increase of 24,828,000 bushels over the previous bumper crop grown in 1923. But not only wheat promises a bumper yield this year; oats, barley, rye and other grains as well as the whole range of field and orchard crops promise record returns. The 1927 crop of 16,524,000 tons of hay and clover from 10,157,836 acres is the largest yield ever recorded in Canada.

The yield of oats has also been good with an estimated production of 502,199,000 bushels, of which 332,494,000 bushels were produced in the Prairie Provinces. Particularly good crops are being harvested in both Saskatchewan and Alberta and the estimate for the Prairie Provinces is the second largest shown. In 1923 it was estimated that 391,756,000 bushels were harvested in Western Canada. The 1927 production of barley is expected to be 98,000,000 bushels, and rye 17,462,000 bushels.

Though good weather is still required for the completion of threshing operations, these have now advanced so far that over a considerable area threshing is finished. There is naturally a feeling of optimism among Canadian farmers and business men. Not for years has the general outlook been so encouraging in Canada as it is at present.

Japanese Royalty Engaged

Heir To Japanese Throne Is Betrothed To Daughter Of Prince

Prince Chichibu, 25, brother of the Japanese Emperor, and next in line to the throne, is reported betrothed to Mahiko Ichijo, 17-year-old daughter of Prince Ichijo, says a Tokio despatch to the Evening News.

Prince Ichijo is chief ritualist of the Imperial Court and a member of the ancient Kito nobility.

The despatch says that an early engagement of the Prince is urged by court dignitaries and the lack of a son in the emperor's family (a second daughter was recently born) is felt to make the early marriage of Prince Chichibu desirable.

The first step is often so expensive that you can't afford to take the second.

Children Cry For "Castoria"

Especially Prepared for Infants and Children of All Ages

Mother: Fletcher's Castoria has been in use for over 30 years to relieve babies and children of Constipation, Flatulence, Wind, Colic and Diarrhea, alleviating Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food, giving natural sleep without opium.

Lignite Utilization Board

Plant At Binfield, Saskatchewan To Be Remodelled

Official announcement has been made by the minister in charge of the Bureau of Industries of the Government of Saskatchewan that the plant of the Lignite Utilization Board at Binfield, Sask., has been accepted by the organized western Dominion Colonies Company of Winnipeg, which company will remodel the plant for commercial operations at the earliest possible date. Negotiations looking to this end have been carried on for some years following the experiments by the board from 1919 to 1923.

This Wonder Liquid Dissolves Corns Quickly

Makes them shrivel up, makes them drop off, makes your feet feel well in a day or two. Relief is instantaneous. Point on a few drops of Putnam's Corn Extractor tonight—see how well your feet feel in the morning. It's a wonder liquid—a marvel-work. Notion of getting rid of corns as Putnam's Corn Extractor. Get Putnam's from your druggist—today. Satisfaction guaranteed.

Saskatchewan Furs

The total estimated amount of minnow-skins of Saskatchewan for the many kinds of fur they brought in in 1926 is \$1,266,706. The number of furs brought in was 650,745 the greatest being muskrat number 493,858 with a value of \$586,829, and the next coyote, with 30,415 pelts worth \$274,275.

DYSENTERY WAS SO BAD BECAME ALARMED

Mrs. Wallace Pepper, R.F. No. 6, Simcoe, Ont., writes: "I was very ill with dysentery. I lost my appetite, and had great severe pains in the bowels. I was so weak that I could not get up. I passed blood which greatly alarmed me, so I hurried to the doctor. He told me the quickest way to get rid of it would be to take

"I took only part of a bottle and was completely relieved. I feel I cannot recommend it too highly." This wonderful bowel complaint remedy has been on the market for the past 40 years; put up only by The T. M. Burns Co., Limited, Toronto, Ont.

Ship Hens For Egg Contest

First Canadian Entry Left Vancouver Recently For England

The first Canadian entry to the international egg laying contest, which will open at Preston, Lancashire, England, shortly, left Vancouver in a specially equipped express car over the Canadian National Railway. The shipment was made up of thirteen white leghorns from the pens of Farmington Brothers, Burnaby, under the supervision of Prof. E. A. Lloyd of the University of British Columbia.

During the long journey sufficient British Columbia apples were being carried to furnish each bird with one daily.

Seeking Ship For Command

Arriving at Oslo, Norway, Lieut. Bert Balchen, of Commander Richard E. Byrd's trans-Atlantic crew, answered as follows to an inquiry as to the purpose of his visit: "Commander Byrd asked me to come to Norway and find a ship which he intends to send to the Ross barrier this winter for reconnoissance before he starts the great antarctic expedition next year. In addition to the ship my task also is to find equipment and men, especially eskiers, who are ready to leave for the Antarctic this autumn."

Alfalfa Meal Will

Edmonton interests are looking to the possibility of establishing an alfalfa meal mill at Lethbridge, for the grinding of alfalfa and the making of milk feeds with ground alfalfa and by-products from the Raymond sugar factory as a basis. The extending acreage of alfalfa in the irrigation districts about Lethbridge has roused this interest.

Relieves Sour Throat—Minard's Liniment.

Some Highways Over-Signed

Directions Necessary Only Where Road Is Doubtful Or Dangerous "Signing the highways" has long been a topic for departmental consideration. Some have done little, others a good job, and some have "over-signed" their highways.

We read in newspapers of patients who take an overdose of doctor's medicine and die. The motorists in some localities are in the same position—overdoses of "signs" cause near death to many good trips, and travelling is "hard work."

Whoever is in charge of signs in your highway department should study the situation carefully, and erect signs at every place where the motorist can go wrong or is in danger. No other directions are necessary. One sign correctly placed is better than ten signs placed "hit or miss."

Is Efficient Store-Keeper

Blind Man At Salt Lake Expert In Distinguishing Coins

Charles A. Larson has been blind for 16 years, but he conducts his grocery store at the Salt Lake tourist park as efficiently as though his sight was unimpaired. His wife and two daughters assist at times, but he is not dependent upon them. Every commodity is put in a designated place and Larson is able to walk to any part of the store, select the article wanted by the customer, and return to the counter. He is an expert in distinguishing coins, and him no difficulty in making change. Scores of tourists have bought supplies from him without learning of his affliction.

Manitoba Make Binder Twine

Five hundred acres of hemp are under cultivation within a radius of five miles of the plant of the Manitoba Cordage Company at Portage la Prairie. This year the company has been experimenting with binder twine and, according to reports, certain farmers are being supplied with a number of bales for trial purposes, to report on its quality after use.

FOR Colds

ASPIRIN

Proved safe by millions and prescribed by physicians for

Colds, Neuritis, Pain, Toothache, Headache, Lumbago, Neuralgia, Rheumatism

DOES NOT AFFECT THE HEART

Safe

WARNING! Beware of Counterfeits

There is only one genuine "ASPIRIN" tablet. If a tablet is offered as "ASPIRIN" and is not stamped with the "Bayer Cross"—refuse it with contempt—it is "ASPIRIN" at all! Don't take chances!

Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoclonal and Bayer's Aspirin (Acetylsalicylic Acid, A. S. A.). While it is well known that Bayer Company will be stamped with their general trade mark, the "Bayer Cross"

A Praiseworthy Hobby

Giving away flowers to the sick has been the hobby of a man of Greenville, South Carolina, for the past twenty years. He estimates he has given 80,000 bouquets to the sick. Now a man of sixty-six years he spends early mornings and evenings in his flower garden. Each Sunday he picks the flowers in bloom and makes his weekly round of Greenville hospitals and sick beds.

FOR MOTHERS OF YOUNG CHILDREN

Mothers are quick to praise anything which brings health and comfort to their little ones—any medicine that will make the baby well and keep him well will always receive hearty recommendation from the mother. That is why Baby's Own Tablets are so popular. Thousands of mothers, throughout the country, not only use them for their own little ones but are always delighted to be able to recommend them to other mothers. Thousands of mothers have proved Baby's Own Tablets to be without an equal in relieving the little ones of any of the many minor ailments which arise out of a derangement of the stomach and bowels. Baby's Own Tablets are the ideal laxative—easy to take but thorough in action. They banish constipation and indigestion; break up colds and simple fevers; expel worms and make the teething period easy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The fastest-moving living creature is the deer or bob of North America and Europe. Entomologists say it can fly at the rate of 185 miles an hour.

Many have been relieved of corns by Holloway's Corn Remover. It has a power of its own that will be found effective.

If you would retain a man's friendship don't try to show him that he isn't half as smart as he thinks he is.

It's an easy matter to get around any one you can see through.

Canada Is Rapidly Becoming Big Game Country As Result Of Efficient Conservation Laws

There is a growing realization in all parts of the world of the great resource Canada is in her game. This is denoted by the fact that Canada is rapidly becoming one of the leading big game countries of the world, due to good fortune in having a large original stock of these animals and to efficient conservation of them by law, close seasons, and sanctuaries.

The climate and soft conditions which have given Canada her wheat fields and her timber lands have also provided grazing grounds and winter shelters for a great variety of big game. Canada's forests and open spaces were, on the arrival of the first white men, abundantly stocked with game, and although both animals and birds retired before the advance of settlement there, were fortunately in every section of the country some natural sanctuary into which they could retreat to live and multiply in safety.

There was a time in early days, when settlers, striving to clear lands for cultivated fields, looked upon the forest and the game it contained as a phase of development that must pass away. In those days there was little regard for season or sanctuary, but fortunately Canada was so big and the hinterland so vast that the game escaped destruction.

Heavy broods were sometimes made on certain species, and a historian writing in 1925 predicted, the early disappearance of the moose from a certain district. Today, a hundred years later, moose are much more plentiful in that section than they were then, and people today value big game too highly to run any risks of its extermination by poaching and pot-hunting.

Thus, all over Canada, there is a growing realization of the value of the resource we have in big game and a determination to make the best use of it for today and for tomorrow. The idea that prevails in some countries, that game is a luxury in which the average citizen is not interested, has no foothold in Canada because the opportunities for sport are open to everybody. In this age too, when life in town and country is lived at high tension, recreation is necessary for all, and the best forms of recreation are those which keep people in the open air and which provide a change from the regular occupations of life. This is true in a high degree of hunting, whether with gun or camera.

People are becoming aware of the fact that game is a great natural resource and one that must not be permitted to decrease, and further, that in Canada hunting is not carried on at the expense of any other interest. In crowded Europe in old times arable fields were turned into forests to make hunting grounds for the wealthy, but Canada is fortunate in having game lands in every section of the country, and in the fact that the growth of timber and to forests the regulated hunting of game is not an injury; on the other hand this contact of town dwellers with the great outdoors is really a benefit since it makes them conscious of the value of the woodlands.

The big game animals which may be taken in Canada, are moose, caribou, deer, bighorn sheep, Rocky Mountain goat, bear, grizzly bear, and lynx. Moose, deer, and bear are the chief animals in the Maritimes, in Quebec and Ontario, and in the Prairie Provinces, and in most of them caribou may also be hunted in season. In the Prairie Provinces and British Columbia, buffalo and antelope are protected at all seasons and there is the case in regard to elk or wapiti, except in certain localities. There is an open season for bighorn sheep and mountain goat in Alberta and British Columbia.

In addition to the big game, the game birds which may be shot are duck, brant, geese, woodcock, Wilson's snipe, rail, ptarmigan, partridge, chicken, ruffed grouse, and Hungarian partridge.

The enactment and administration of laws respecting big game come within the purview of the provinces and as changes may be made upon comparatively short notice, hunters

from a distance intending to hunt in a particular locality will naturally communicate with the game department of the province in which they are interested, and with the railways and other transportation companies.

Sunflower Native Of Peru

Was Taken From South America To Britain By Spaniards
The tall and stately sunflower, according to an article published in Pearson's Weekly, came originally from South America, the land of the Sun Worshipers, and was regarded as sacred.

The gaudy sunflower is a native of Peru—the Peruvian marigold—and was taken to Great Britain by the Spaniards after their conquest of the country in the sixteenth century. The Spaniards discovered that Peru produced two sorts of sunflowers. They saw the plains covered by a magnificent show of the sunflowers generally known, and were astonished to see how the stems rose upwards of twenty feet in height, bearing blooms measuring some sixteen inches across.

In the temples they found the odd kind of sunflower—beautiful reproductions of the stately flower, modelled with exquisite workmanship in the purest gold.

The sunflower is named from the way its flower-head follows the sun's radiant face, and follows the sun with its own face from rising to setting.

The head of a single sunflower may contain between two and three thousand seeds. When peeled, these have a taste like sweet almonds, and from the oily nature make an excellent food for fattening chickens.

In Canada and the United States the sunflower is cultivated for the sake of the oil, which is refined until fit for use with salads.

New Wheat Variety

Herman Treile Said To Be Developing A New Strain That Will Ripen Earlier

Herman Treile, world's champion wheat and oat grower, is paving the way for a new triumph that will likely cause a stir in the grain growing belts of Canada and the United States. Mr. Treile is working upon a wheat which, according to records, can be sown later and ripens eighteen days earlier than present varieties and which, it is stated, will cause something of a revolution in wheat growing in Western Canada.

Canada's White Pine

The botanical range of the white pine in Canada extends from the Atlantic coast to the province of Manitoba. It is confined to the region lying south of a line running approximately from the southeast corner of Lake Winnipeg through Lake Nipigon, along the height of land north of Lake Temiskaming, through Lake St. John to Point de Mota on the St. Lawrence and Cape Breton Island.

Winnipeg Newspaper Union Fashion

A Youthful Frock
This charmingly simple frock is in one piece with two gathered flounces of material or lace at the front. The sleeves are long and gathered to wrist-bands, or short and open at the sides. Ribbon is used for the belt, bows, and binding on the neck and short sleeves. No. 1650 is used for misses and small women, and is in sizes 16, 18 and 20 years. View A, size 18 (36 bust) requires 3 1/2 yards 29-inch, or 2 1/2 yards 54-inch material. Canadian Air League

Would Assist Civil, Commercial and Military Aviation

Steps have been taken to form a Canadian air league similar in scope and function to the Air League of the British Empire formed in Great Britain in 1909. The formation of such a league fills the need of a representative organization in each country of the Empire to assist civil, commercial and military development of aviation. A Canadian Air League, it was pointed out, would have a great scope and opportunity in assisting and guiding development, and in helping to link up Imperial lines of air communication and influencing the coming "world transformation through aviation."

Sometimes a man is so respectable that his neighbors have but little respect for him.

Reduction In Income And Sales Tax Would Help To Speed Up Business

Clean Milking

One Of The Chief Factors Of Success In Dairy Farming

Few operations on the farm require more skill and concentration than milking, which is one of the chief factors of success in dairy farming. The importance of the human element in the production of milk of a high standard of cleanliness cannot be over-emphasized. Clean milkers, clean cows and clean utensils are all essential. The milker must be very particular about details. What these details are is clearly stated in a pamphlet on Producing Clean Milk available at the Publications Branch, Department of Agriculture, Ottawa. The flanks and udder of the cow should be carefully brushed about half an hour before milking, and just before milking the udder should be wiped off with a damp cloth, using clear warm water or a weak disinfectant solution. It is important to dry well, preferably with a second clean cloth. The use of a covered pail is strongly to be recommended, and it should be absolutely clean and sterilized.

Large Planes Needed For Ocean Flights

Airplanes Preferable To Hydroplanes Says Canadian Aviation Manufacturer

Regular flying between Europe and America is undoubtedly reserved for planes of many motors, capable of flying about 5,000 miles without landing. G. Caproni, famous aeroplane manufacturer, maintains:

If Newfoundland and the Azores are supplied with well equipped landing stations, however, aeroplanes will be preferable to hydroplanes for crossing the ocean, Caproni thinks. But the aeroplane must be equipped with mechanism enabling it to float in the roughest sea in case of forced descent, he believes. He declared they should fly at an altitude of about 25,000 feet and at a speed of 187 miles an hour; the pilots and passengers being in hermetically sealed cabins, supplied with compressed air.

A flight from Rome to New York could be accomplished in less than 24 hours, he said.

Tobacco Grown In Alberta

Marlin Baker, of Edmonton, has further demonstrated this year the possibility of successfully growing tobacco in Alberta. Last year he cropped a full acre of the fragrant weed and this year is securing an abundant harvest of strong and healthy plants from three and a half acres.

Tommy—"Aunt Nell, why do you bite the end of that pencil?"

Aunt Nell—"Because I'm nervous dear."

Tommy—"And are you nervous 'cause I've been killing spiders with the pencil?"

Wisdom and love have never been able to form an effective alliance.

A reduction in the income tax to assist industry and commerce and a reduction in the sales tax to help the working man are thought to be the objectives mentioned by Hon. J. A. Robb, minister of finance in his recent speech in North Western forecasting further tariff reduction next year.

Until the budget is brought down the public, not even the Cabinet knows what taxation reductions or increases may be in store, but several factors have entered into the situation that point to the reductions suggested.

The two taxes mentioned are direct taxes and the benefit thereof is immediately felt. Last year when the income tax was reduced the taxpayer saw in the "10 per cent reduction" on his income tax return a definite amount of money saved by the present administration. By changing that 10 per cent to 20 or 25 in the budget, there will be a similar visible and concrete evidence for the public to see.

In the case of the sales tax the result will be felt in the reduction in the prices of commodities—not very much, but still enough to be seen. The retail merchants of Canada have repeatedly pressed for a reduction or the abolition of the sales tax as an impediment to business and it is thought that Mr. Robb might be able to do this.

Possibility of reductions, via the tariff route do not loom very large. The tariff board has reported on a number of cases, half of which asked for tariff increases and half for reductions. The two things the general public is most interested in and which have been repeatedly discussed as objects for tariff reduction were the subject of applications for increases. These are boots and shoes, and woolen goods, the latter having a direct bearing on the cost of clothes. So far as is known the tariff board has made no recommendation with reference to any big reductions such as have taken place in farm implements and automobiles in recent years.

The chief indication pointing to income tax reductions is that Hon. Euler, minister of national revenue, has already collected for this year as much money as the tax yielded in the whole of last year. He has eliminated the privileged politician and the tax dodger, and has made everybody pay who had a taxable income, equalizing the burden to a greater extent. In addition he has collected a great deal more money in customs duties, so that his department has contributed huge additional sums to the National Exchequer by carrying out the law as it was intended. This has had the additional benefit of increasing the sale of "Made in Canada" goods.

One retail merchant wrote to the department recently that since Mr. Euler's preventive officers had been in his district, his sales had increased 30 per cent.

Book Always Good Friend

When Presented As Gift Should Receive Careful Thought

A book is always a good friend. It carries with it something personal. When presented as a gift it contains more than the intent of the giver. It is an expression of taste and a recognition of personal appreciation. It reflects the giver; it evaluates the recipient. Therefore give a book with thought, with deliberation. When you are thinking of your friends, think of them in the light of their personal tastes, of their intellectual bent, of their spiritual associations. To give a highly selected book means to display intellectual culture on the part of the giver.

Briggs: "We have twin boys at our house and don't know what to name 'em. One is a little taller than the other."

Jeanette: "Why not call them 'Gus and Hygiene'?"

"George, I'll give you a plot of Scotch if you'll hurry over to my house and get my girl. Hurry now."

"Gone! Boys, it's back."

Three representatives of "Greater London Press" are shown above on the recent visit of British editors to Canada. On the left is Walter Brown, director and manager of the Horney Journal. In the centre is John Sidney King, president of the British Newspaper Society, and on the right is Herbert Henry Norman, manager-director of the South London Press. Greater London's Greater Press is a chain of twenty-one leading newspapers surrounding London. The group of which Mr. King is chairman covers an area fifteen square miles. It represents a population of over seven million.

COSGRAVE MAY CARRY ON FOR ANOTHER YEAR

Dublin. — President Cosgrave's Free State government, despite the disappointing outcome of the parliamentary elections, intends to carry on with the expectation of at least a year of life. In making this announcement, Hon. Ernest Blythe, vice-president of the council, stated that a new loan will be floated in December.

The ministers, all of whom were re-elected, are confident it may be taken from this, that when the new Dail convenes October 11, it will approve the continuance of Mr. Cosgrave as president of the council and that he will accept the mandate.

There is no doubt, observes, that such an outcome would meet with the wishes of the business community throughout the Free State, regardless of political affiliations.

It is realized, however, that the administration with him to go steadily and that its success will depend upon how far it is able to carry with it one or more of the smaller groups in the Dail. Although the farmers, with six deputies, and the independents with twenty, are commonly ranked as government supporters in the Dail, their attitude is not one of solid adhesion.

In fact, P. F. Daxler, leader of the Farmers' Party, who lost his seat in the election, is quoted as saying that Cavan recently, as President Cosgrave had not secured a definite mandate from the country the alternative was to make way for the Finna Fall and Eise Eamon de Valera a chance to prove his policy practical and there is a suggestion that Mr. Cosgrave may offer a government portfolio to a member of the Farmers' Party and that in this case the party would vote solidly for him.

League May Meet In Ottawa

Canada Planning To Invite Council To Meet Here

Geneva.—Canada, recently elected to a non-permanent seat on the council of the League of Nations, is reported to be planning to invite the council to sit at Ottawa in fact there is a projected scheme to have the whole League assembly meet there in order to give American newspaper and League sympathizers a ready occasion to study its workings at first hand. This project is still in abeyance. It seems certain that one of the council's meetings in the near future will be held in Berlin.

The Maharajah of Kapurthala, one of the chief reigning princes in India, would like to see a session of the League council held at Delhi, India's capital, at some not too distant date.

Speaking to a correspondent to day, he asserted the governing classes in India are doing all possible to interest their people in the aims and aspirations of the League.

Wheat Pool and Prices

Pool Will Not Be Used To Boost Prices To The Consumer

Ottawa.—There was no cause for alarm or reason to expect that the farmers would use the wheat pools to boost the price of wheat, Hon. W. R. Motherwell, federal Minister of Agriculture, told the convention of the Bread and Cake Bakers' Association in session here, last night. Mr. Motherwell spoke on "cooperation" and said the wheat pool was by far the best measure which had ever been taken by the farmers for their own prosperity and consequently for that of the entire country.

It would be virtually impossible, he said, for Canadian farmers to hold wheat for any length of time with a view to raising the price. Outside competition was too great from the point of view of exporters, he said.

Plane To Carry Sixty Passengers
Paris.—Charles A. Levine is planning to return to the United States on October 11 on a new French passenger liner, with the intention of building a huge airplane capable of carrying sixty passengers across the Atlantic in regular flights, one of his closest advisers stated here. No further details of this project could be obtained.

W. N. U. 1700

Freight Rates Case

Reasons For Freight Cut Are Given By Board

Ottawa.—Reasons for judgment in the general freight rates case were made public by the Board of Railway Commissioners. The judgment itself was handed down on August 25 following an extensive investigation of railway freight rates throughout the Dominion. The judgment provided more or less extensive reductions in rates on grain and other commodities for export.

The reasons issued recently cover 200 pages and review in detail the hearings in the different parts of Canada, together with the conclusions arrived at by each of the commissioners. In the main, Chief Commissioner H. A. McKeown, Assistant Chief Commissioner McKean, and Commissioners Vich, Boyce and Lawrence are in agreement on the main points covered in the August judgment, namely: transcontinental rate scale; terminal tariffs; differential station mileage; East and West; and domestic grain rates to British Columbia.

Commissioner Oliver submits a number of conclusions differing from those of the other members on the board. A schedule dealing with 80 various individual applications is being prepared and will be issued by the board within the next week.

Impressed With Canada

Grandson Of Famous "Iron Chancellor" Paying Visit To Dominion
Ottawa.—Count Blum, grandson of the famous German statesman, Prince Otto Eduard Leopold Von Bismarck, was the famous "Iron Chancellor," arrived in Ottawa from Chicago to spend the next few days in the capital. Count Blum is interested particularly in agriculture, and he visited the Dominion Experimental Farm here.

The young count has seen something of the Canadian west, as from Winnipeg he visited the Manitoba wheat fields. He said he had been greatly interested in the operations of the Canadian wheat pools and the Winnipeg Grain Exchange. He was impressed also with the extent to which machinery is used on the western farms—far more, he said, than in Germany, where farms were smaller and labor less expensive.

Silk Train Wrecked

Valuable Cargo Tumbles Down Embankment When Train Leaves Rails

Vancouver.—Raw silk valued at \$250,000 was lying in the Fraser River and on the bank of the stream near Yale, east of here, as the result of the wreck of a Canadian Pacific Railway special silk train travelling east. The train, consisting of 15 cars, destroyed telegraphic communication along the Canadian Pacific Railway track, when two cars lurched down the bank.

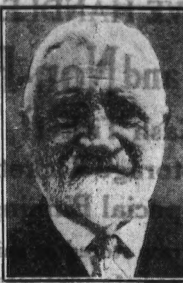

Five cars tumbled into the turbulent waters of the Fraser River, while the five others were arrested in their fall by rocks and trees.

Suspend Code Sub-Section
Regin.—That subsection of the criminal code which forbids an alien to be in possession of a shot gun, rifle or ammunition is to be suspended in so far as it relates to the Northwest Territories as the Gazette notifies. The suspension is brought about by representations of the R.C.M.P. that to prohibit such weapons would be to deprive trappers of their means of livelihood. There were other considerations too.

Study Einstein's Theory
Geneva.—Two Belgian scientists, Professor Picard and Dr. Stahel, have installed a physics laboratory on the summit of Bligh-Kain, 5,900 feet above Lucerne. Their object, especially, is to make a study of Einstein's theory of relativity. American and English scientists are invited, it was said, to visit the new laboratory.

U.S. Ambassador To Mexico
Washington.—Dwight W. Morrow, the New York banker, has been selected by President Coolidge to be ambassador to Mexico. The Washington Government has obtained the Mexican Government's sanction of the selection. The post has been vacant since Ambassador Sheffield resigned last July.

Will Attend Convention

Acton Burrows, Toronto, Ontario, will be an interesting delegate at the Dominion Conservative party convention in Winnipeg. He was one of the secretaries at the Conservative convention in 1878—nearly half a century ago—when Sir John A. Macdonald's famous national policy was launched, and he has the original of the resolution that was passed on that historic convention.

To Aid In Defence

New Zealand To Help Pay Expenses Of Singapore Naval Base

Wellington, N.Z.—Premier Cooper introduced in the House of Representatives the government's naval defence proposals, of which the chief feature is a contribution by New Zealand to the Singapore naval base.

The premier said that the proposals would bring New Zealand's expenditure on naval defence up to ten shillings (about \$2.50) per capita.

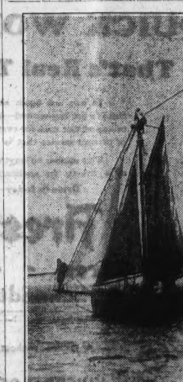

No effort to Japan was contemplated in any way by the construction of the Singapore base, he said, adding that Japan's action in the great war had been unfortunate, especially the visit of Japanese warships to New Zealand waters to assist in the conveying of troops.

Considering the long trade routes to be defended by Great Britain, Premier Cooper said, New Zealand was going to shoulder a fair share of the imperial budget.

The proposals were adopted by the house 51 to 10.

Receive Higher Wages

Berlin.—Instead of taxing bachelors, Germany is considering paying bachelor employees of the government more than the married men. At a conference in the foreign office regarding a nation-wide increase in wages, the majority report asked higher wages for bachelors because they are more expensive for them, as they have no wives to cook for them and spend much more on amusements.

Baldwin Sees Whaler in Action

Premier Baldwin's bird's eye view of the whaling industry in action was not far from the Canadian Pacific Express of Scotland steamed out of the harbor of North Sydney recently towards the Premier's headquarters. When only a short way out a seavoy, a few old whalers seen above the crest of the bow of the huge liner for the purpose of demonstrating to the Premier just how their operations are carried out. The photograph shows

Protest Tariff Change

Manufacturers Of Cutters and Buggies Object To Reduction In Duty

Ottawa.—Manufacturers of buggies and cutters protested to the tariff board against the application of the Consumers' League for a reduction of the duty on these articles. The manufacturers asked that the present duty be retained and that the sales tax be removed. This would save the purchasers \$1 to \$6 on buggies and \$1.50 to \$3 on cutters. Approximately 1,200 buggies were sold in Canada every year, it was stated.

J. S. Beauchamp, of the Consumers' League, argued that the existing tariff was more than enough to protect the industry. A buggy that cost \$46 in the United States cost \$109 in Canada. The Canadian industry, he said, had a pretty full measure of protection.

Mission School Tragedy

Grey Nuns Sister and Nineteen Children Perish In Flames

Big fire—Death and destruction today stalk in the frontier outpost of civilization at Beauval, a hamlet 130 miles north of here.

There the bodies of 19 children, ranging in age from six to twelve and that of a woman lie waiting for a coroner's investigation. All but one of the victims of a midnight blaze that swept the Roman Catholic mission.

From the meagre details the fire swept the three-story frame building with such rapidity that in three or four minutes the entire structure, timber like, through lack of rain for some time, was enveloped.

The victims are 19 pupils of the school and Sister Lea in charge of the dormitory where the fire was first discovered. In addition, a priest was so badly burned in the rescue work that he is not expected to live.

Forty-six children were saved from the inferno.

The fire is believed to have started in the centre of the building, close to the furnace, and spread towards the boys' dormitory.

To Set Slaves Free

New Ruling Gives Liberty To Slaves In Sierra Leone

London.—A new ordinance will be introduced in the legislative council of Sierra Leone, British protectorate on the west coast of Africa, which will have the effect of entirely freeing all the slaves in the protectorate after January 1, 1928. The new ordinance is the result of conversations between the British Government and the Sierra Leone Government.

Approximately 250,000 slaves will be able to leave their masters should they desire to do so as soon as the ordinance becomes a law, it was stated in official circles.

SOVIETS CAUSE STRONG PROTEST FROM FRANCE

Paris.—The storm which has been hovering over the head of Christian Rakovsky, Soviet ambassador to France, has blown at last. Mr. Martin announces that France has officially informed the Moscow government that Rakovsky's recall is an indispensable condition for a non-aggression pact with the Soviets.

Furthermore, the French ambassador, M. Herbet, was instructed to say the Soviets must give practical proof of their intention to live up, both in spirit and in letter, to their solemn undertaking, entered into in 1924, to abstain from all interference with France's internal affairs, by ordering their agents and spies of the third or communist international, to cease activities in France.

In addition, France requires that the Soviets take active steps to bring to a conclusion the long drawn negotiations for settlement of Russia's debts to France.

Only when these conditions have been scrupulously fulfilled, Mr. Herbet was instructed to say, will France consent to open negotiations for the treaty of non-aggression, recently proposed by the Soviet government.

The latest Franco-Russian crisis thus brought to a head, began when Ambassador Rakovsky signed, as a member of a Russian communist party committee, a manifesto urging the soldiers of all nations to mutiny and overthrow the bourgeois governments.

This raised a storm of protest in France and repeated representations were made to Moscow. Foreign Minister Tschitcherine, the Soviet government, at first, disapproved, and then formally disavowed M. Rakovsky's action, but took no steps to recall him.

Instead, Tschitcherine offered to enter into a treaty of non-aggression and non-interference in internal affairs.

Three-Motor-Plane

Ready For Flight

Will Leave North Sea Island On Trans-Atlantic Trip

Berlin.—Despite vicissitudes by directors of the Junkers Aeroplane Works, it was learned from an unquestionable source that the G-24, a three-motor plane, has been made ready at Malmö, Sweden, for a trans-Atlantic flight, and will arrive at any time at Norddeich, the North Sea Island which was a German airplane base during the war.

The plane, it was learned, will be piloted by Friedrich Loose, one of the Bremen pilots on the recent unsuccessful Junkers trans-Atlantic venture, and by Herr Starker, who is regularly employed at Luftthansa's test station at Kiel, but who has taken a leave of absence to make the trans-Atlantic crossing.

The flight is planned to proceed in stages by way of Lisbon and the Azores, and then probably to Bermuda, although it is possible that the route may shift to Newfoundland. Dessau, Germany—Junkers' officials here said that a type of the G-24 machine was ready for a trans-Atlantic flight to the United States, but insisted that the Junkers Corporation had nothing to do with the project. They stated that they had merely sold the plane some time ago to a north German undertaking.

Canada's Auto Production

August Increase Fifteen Per Cent. Over July Output

Ottawa.—Production of automobiles in Canada during August totalled 12,236 cars, an increase of 15 per cent. over the output of 10,587 units in July, which was the lowest month this year, but 15 per cent. under the 15,261 cars reported for August of a year ago.

Production in August of this year included 2,486 open passenger cars, 6,668 closed passenger cars, 2,323 trucks and 716 chassis. Of the 716 chassis, 651 were intended for passenger cars, 12 for trucks, and 53 for either passenger or freight service.

Here and There

One year from date of publication
to the Canada Gazette new regula-
tions requiring the inspection and
grading of fruit for exportation
come into effect. They will require
that all fresh fruit must be inspected
and an export inspection certificate
issued showing the grade before
leaving the country.

A record was established at Que-
bec recently with nine passenger
vessels arriving and landing pas-
sengers and mail, the largest num-
ber ever to visit the port at any
one time. Included in the arrivals
were the "Empress of Scotland,"
the "Montclair," "Montclair,"
"Marloch" and "Mellita" of the
Canadian Pacific Steamships.

A new high record of \$15,824-
821 in gold production of the pro-
vince of Ontario during the first
half year is shown in the re-
port just out, the increase over the
similar period of last year being a
quarter of a million. During the
same half year the total production
of all minerals in Ontario was \$45-
103,223, as against \$42,584,402 for
the same half year of 1926.

To serve the interests of hundreds
of farmers in Southern Saskatchewan
two new branch lines of the
Canadian Pacific Railway started
operation on September 1st, accord-
ing to announcement by C. C. Cole-
man, Vice-President, C.P.R. The
longer of the two lines run from
Assiniboine south to Coronach, a
distance of 50 miles, and the second,
a 27-mile stretch, runs from Brom-
head to Lake Alma.

The 100 members of the British
Newspapers' Society left Canada
thoroughly impressed with the op-
portunities Canada possesses. Their
impressions are that "Canada was
already great and is potentially
much greater, and they were am-
azed that so much could have been
accomplished in Canada in such a
short time by so few people. They
sailed from Montreal on the Cana-
dian Pacific Steamship "Mont-
clair," the ship having a large pas-
senger list.

After a strenuous six weeks trav-
elling across the Dominion of
Canada, Their Royal Highnesses,
the Prince of Wales and his brother
George, embarked on the Canadian
Pacific Flagship, the "Empress of
Scotland," tired but happy. Prince
Edward says, "Every time I come to
your country I am more and more
attracted by the wonderful natural
scenery and the warmth of the wel-
come extended by Canadians, and
trust that it will not be long be-
fore we meet again."

Approximately 1,000 members of
the American Legion visited Mont-
real on their way to Paris, France,
where they will hold their 9th an-
nual convention. The people came
from Idaho, Buffalo, Wisconsin,
Washington, Montana and North
and South Dakota. Frank X.
Schwab, mayor of Buffalo, gave the
Legionnaires of that city a wild
buffalo to be presented to the citi-
zens of Paris. They crossed to Ant-
werp on the "Montclair" and
"Montclair," both liners in the
Canadian Pacific service.

"A land of good wages and un-
limited possibilities," is the man-
ner in which Premier Stanley Baldwin
characterized Canada in his first
public address in the Old Dominion
after his return from the Domini-
on. Ninety-five per cent. of the
men (of whom we hear too much)
who go out to the Dominion and
fall, owe their failures to them-
selves. I have no doubt that a man
can succeed on the land there even
if he has not been brought up in
the country at home. A little train-
ing will go a long way."

PAINTED FIRES

BY NELLIE L. McCLUNG

COPYRIGHT, CANADA, 1925

CHAPTER VIII.—Continued.

"I do pray," said Helmi, in her own defence "but not loud. Just as God knov. I don't like big row — neither does my God."

After that the matron tried giving Helmi more than her share of work, but that plan was soon abandoned. Work melted before Helmi's clever hands. Then came isolation. Helmi's heart was so hard she could not have her meals with the other girls. Helmi bore this complacently. Anything better than having the whole roomful starfish at her.

Helmi had four happy hours each day, four hours that slipped by her on shining wings, when the dining-room table was cleared and lessons were given by Miss de Forest. Always Miss de Forest smiled when she looked at Helmi, and called her "little starfish," praised her neat, clear writing, and gave her a beautiful shiny-backed note-book with green lines in it for her own. Miss de Forest did not live at the Home, but came each day in her little car, her coming and going being events in the drab lives of the young prisoners to whom she came as an ambassador from a happier world.

To the Matron, Miss de Forest went one day with something weighing heavily on her mind. Mrs. Wymuth was in her "Retreat," and looked up questioningly when the teacher entered.

"Mrs. Wymuth, this system is all wrong," began Miss de Forest, impulsively. "This young Pinn girl who has just come in is as sweet and innocent as a rose, but she has to associate with all classes here. Rose Lamb has just come back from a terrible debauch, and she is full of the glory of her adventures—she knows every drink in the city. Lucille's a bad one about due. Minnie is in the same condition, and the others are fearing fast any wickedness they did not know. Many of these girls are mentally deficient. Certainly this is no place for a bright, lovely young girl like Helmi. I always have thought it poor story, but since Helmi came it seems positively devilish."

Mrs. Wymuth's lips were thin as she replied: "We have nothing to do with the system, Miss de Forest; that has been carefully thought out by the Board. You forget that under the softening influence of Divine grace, the hardest hearts are melted. Rose Lamb has had a wonderful conversion since she was brought back, and is a better girl this moment than Helmi with her proud and stubborn will. Rose is a brand plucked from the burning. Helmi is a saint in disguise. Miss de Forest protested stormily. At the end of the month Miss de

Forest was dismissed. The letter from the Board said "it was deemed advisable to make a change."

During the rule of the former matron the hospital room was downstairs, located as far as possible from the dormitory. The Wymuths had other plans. They believed it was well for the girls to know the wages of sin. So on the dreadful night that Lucille spent in hospital, the girls huddled together in agony, listening, listening. Poor Lucille, with her shining brown curls! Every girl but Rose Lamb cried in sympathy, and some in shrinking terror. The new girl who had come in that day came over to Helmi, who had her in her warm young arms all night. Like a stone she was, poor little Esther, her teeth chattered and her little heart beat wildly like a hunted hare's. Helmi did her best to comfort her.

Rose Lamb alone was calm. She sat up in bed and addressed the girls: "See here, kids," she said, "Lucille was a big fool, and it serves her right. She didn't need it."

The girls heaved their sobs and listened raptly. Helmi covered her ears. Something inherently modest and clean in her young heart protested. She did not want to hear.

The Girls' Friendly Home had been built by Christian people. The men who sat on the Board were convinced that they were doing a noble thing. Faithful women sewed and baked and sold tickets to maintain it. O God! O God! what cruel things are sometimes done in the name of Thy Compensating Son!

It was over Minnie that Helmi had her first quarrel with Mrs. Wymuth. Minnie's home was in the country, where the crops had failed, and Minnie had come to the city to find work. There had been no harvest to cut, so it seemed best for Minnie to come away. Only sixteen, innocent, and trusting. Minnie had come to the great city. She wanted money to get shoes for the little ones at her feet. Mrs. Wymuth's eyes were devotedly closed as she eyed back and forward to her own intoning. Her voice whimpered and faltered and rasped like a rusty hinge.

(To Be Continued.)

Worms in children. If they be not attended to, cause convulsions, and often death. Mother Gravel's Worm Expeller will protect the children from these distressing afflictions.

Alberta's Coal Wealth

Greater Than All Known Deposits in the British Empire
Alberta's potential coal wealth is greater than all the known coal deposits in the rest of the British Empire put together, according to Sir Thomas Holland, chairman of the Empire Mining and Metallurgical Council. "The present endeavours to change coal into a fluid fuel, capable of displacing petroleum and all its products, are successful, Canada will take the place of the United States as the world's provider of liquid fuel," he further stated.

Mina's Liniment for Toothache.

There are several countries in which a disease never has been taken. They are: Persia, Afghanistan, the Indo-China peninsula, half of Africa, parts of South America and most of China.

PIMPLES AND ERUPTIONS On Face. Looked Awful. Cuticura Healed.

"My face broke out with pimples and eruptions. They did not trouble me much until about six months ago when suddenly they became large and red, and I could not bring myself to look at my face. Itching and burning. I could not go out in the sun."

"My mother read an advertisement for Cuticura Soap and Ointment and I sent for that, and I said a letter from my mother would do the more good than anything. She said I would get my letter when she saw it to give it to me and not before. I wish I could die—I hope I will die when my time comes."

"No, no," said Helmi, "don't die, Minnie. I'll get your letter if it is

Free Books For Blind

Canada's National Institute For Sightless Distributes Thousands Of Volumes Monthly

Just twenty years ago a library for the unfortunate army of the sightless, who must read with their fingers, was established in Toronto. Now the library department of the Canadian National Institute for the Blind distributes 1,000 bulky volumes a month to blind persons in all parts of Canada and in Newfoundland.

This library is unique in Canada, being the only one with more than merely local distribution. Books supplied cover every range of literature, from geology to poetry. History biography and scientific works are in great demand, and the librarian believes that the sightless consume a relatively greater quantity of this solid fare than those who read with their eyes.

Canada can claim a highly creditable distinction in that it was the first nation to grant free transportation through the mails to embossed literature. This step was accomplished in 1908 by Sir William Mulock, now Chief Justice of Ontario.

If vast importance can only be comprehended when the weight and bulk of an embossed book is considered. It requires thirty-nine Braille volumes to accommodate the Bible. An ordinary Bible can be purchased for 25 cents; the price of the Braille Bible is \$22. Gibbons' "Decline and Fall" requires nearly twelve feet of shelf space and is so popular it is never on the shelves. There is no library for the blind reader, and no matter where he lives in the Dominion, the books he wants are sent free of charge.

Insist On Silent Cars

English Police Ordered To Punish Motorists Making Unnecessary Noise

Active warfare against drivers of motor cars throughout the country who make more noise than is necessary in the driving of their cars has been instituted by the police under explicit orders from the home office.

A little over a year ago the home secretary, Sir William Jaggard-Hicks, issued a warning against motor drivers who failed to use silencers in connection with the running of their cars, and since then nearly 6,000 prosecutions have been made in the metropolitan police district alone. The improvement resulting therefrom, however, is deemed insufficient by the home office and now the warfare is to be prosecuted with still greater vigor, not only in the metropolitan district, but in the country generally.

It Has Many Qualities.—The man who possesses a bottle of Dr. Thomas' Electric Balm is armed against many ills. It will relieve a cough, break cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent aches, and will speedily heal cuts and contusions. It is a medicine chest in itself.

Little Helps For This Week

His secret is with the righteous.—Prov. iii. 32.

Ah! if our souls but pulse and swing like the compass in its brazen ring. Ever level and ever true. To the toll and the task we have to do. We shall sail securely and safely reach The Fortunate Isles.

—Henry Wadsworth Longfellow.

The desire to do right, the will to do right are of ourselves, but of the Lord. He stands ready to give all these in their fulness to all who will receive them.—Theodore Parsons.

Brains and Intelligence

Quality That Counts and Small Brain No Handicap

There is no evidence that the size of the brain has anything to do with intelligence. Men are larger than women, therefore they have larger but not necessarily better brains. Turgenev, the Russian novelist, had an exceptionally large brain, only exceeded by two others; one of the others was an imbecile. Next in weight came a laborer and a bricklayer. The largest woman's brain recorded weighed 1,745 grams; she was insane, and died of consumption. A small brain is no more of a handicap than a small foot. It is quality that counts.

Mina's Liniment for Lumbago.

Sporadic Croup

OVER TEN MILLION JARS USED YEARLY

Farm Prosperity

Increasing Sale Of Agricultural Implements Reported In West This Year

An unfailing indication of farm prosperity is the increasing sale of implements reported by nearly all dealers in the west this year. The demand for haying machinery has been especially heavy, while the sale of threshers, binders, combines and tractors has been exceptionally large, some firms reporting from 100 to 200 per cent. increases in the sales of these implements.

THIS GREAT TONIC RENEWS STRENGTH

Simply Because It Enriches and Builds Up The Blood

In no trouble is delay or neglect more dangerous than in that which means poverty of the blood. It is very common in young girls and in persons who are overworked or confined within doors. It makes its approach in so stealthy a manner that it is not until the system is so far gone that recovery is recognized. But taken in time there is a tonic that so enriches and purifies the blood that good health and strength soon comes to the former weak, anemic sufferer. This tonic is Dr. Williams' Pink Pills, which for years have been the most successful blood-builder known, and have credit for restoring to good health thousands and thousands of people who have suffered from some of the many ailments that come through weak, watery blood.

The correction of anemic conditions by Dr. Williams' Pink Pills is as certain as anything can be. As proof of this Miss Margaret A. Smith, Burgoyne, Ont., says: "After having a severe attack of jaundice, I was in a very weak and run-down condition. I could not sleep at night and would toss and turn for hours at a time. I had no appetite. Dr. Williams' Pink Pills, I soon began to feel better, and after taking a few more boxes of the pills I felt as strong as ever, and could thoroughly enjoy my rest at night. Now, I always recommend these pills to any friends who may be ailing."

Better sleep, steady nerves, improved appetite, increased vigor—all these can be yours by taking Dr. Williams' Pink Pills. Begin them today. Sold by all medicine dealers, or by mail post paid at 50 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Judge—"Madam, have you anything to say?"

Prisoner's Husband (excitedly)—"Now you've done it."

A great man is seldom taken at his true value but lots of others will sell out for more than they are worth.

Does Weakness Detract From Your Good Looks?

—Photo by Michelthorn

Mrs. Thomas Chapman of 3 Somerset Place, Toronto, Ont., whose picture appears here, said: "Dr. Pierce's Favorite Prescription was my help. I don't know it to be the very best female medicine I have ever known. I had a nervous system so weak that I could not sleep. I also suffered from nervous indigestion, but after taking Dr. Pierce's Favorite Prescription I did not suffer with indigestion and I could get a natural night's rest, which I could not do before. No woman can appreciate what a wonderful medicine this 'Favorite Prescription' is until she gives it a trial."

All druggists, Tablets or Liquid. Write to Dr. J. C. Feltz, 101 Hotel Buffalo, N. Y., for free advice.

AVOIDED AN OPERATION

Mrs. Dayman Gives Lydia E. Pinkham's Vegetable Compound the Credit

Collingwood, Ontario.—"When I was first married I was very thin and weak. The doctor said I was weak and would never be able to have a child, but I did, and from the time my baby came I suffered all the time and doctored and doctored. Life became a burden, and doctors said an operation could help me, but my husband was opposed to that. I had seen Lydia E. Pinkham's medicine advertised, so I told my husband that I thought I would try it, that I might get some relief. I had not taken one bottle when I could feel it helping me. I took five bottles and had better health. Now I have three girls and a boy and have done my work up to conformity. I am now at the change of life and owe my good health to Lydia E. Pinkham's Vegetable Compound. I take a bottle when I think I need it."

Mrs. SUSAN DAYMAN, R. R. No. 5, Collingwood, Ontario.

Sold by druggists everywhere.

For Economical Transportation

CHEVROLET

3 years from today
You Will Know

You would require three years of arduous day-to-day driving to know as much about Chevrolet performance and endurance as the General Motors Proving Grounds brings out in a few months.

There's strength—stability—ruggedness built into every inch of the Chevrolet Chassis; into its beautiful body by Fisher; into every detail of its powerful engine.

After years of trouble-free driving, you will know that Chevrolet has added to its economy, its smoothness, its power and its Beauty, the greatest measure of Strength and Endurance ever possessed by any low-priced car.

Ask your Chevrolet dealer for a demonstration.

SUMMERFIELD & MAYER.

Stony Plain and District.

Mr Fred Wanlaum, agent for Woodland Dairy, made an inspection trip thru Stony district on Monday.

Mr Geo E Clarke, Strathcona, was a visitor in Stony Monday evening.

The Jewish Yom Kipper is being celebrated this week.

Mr Otto G Wudel started threshing Tuesday with the steam outfit formerly owned by Gus Gitzel. Louie Ulmer is engineer.

Gus Mintz started threshing Tuesday on the Davis farm with his new large-size gas threshing outfit.

There will be harvest festival services at the Glory Hills Reformed Church (Rev C H Reppert, pastor) on Sunday, Oct. 9. There will be services in the afternoon and evening. Everybody welcome.

For stealing a kodak, the property of Wasyl Pawlyk, young Mike Tyrkalo, was found guilty by Magistrate McLeod, in Stony Plain, last week. The youth was ordered to make restitution of the article stolen, fined \$5 00 and costs, and put on parole for one year, reporting once a month.

If your eyes bother you, or you suffer from headaches, why not have your eyes attended to by an expert? M M Mecklenburg, eye specialist, will be in Stony Plain Thursday, Oct. 6th.

Change in Train Service.

As announced in last week's Sun, a change in the running of the passenger trains on this division took place on Sunday last.

The train-a-day from Pr. Rupert service has been discontinued, and this train has been discontinued and now runs on only three days a week.

Going west Sunday, Tuesday, Friday; leaving Stony at 1 29 p.m. Going east Monday, Wednesday, Friday at 6 55 a.m.

The train from Vancouver will make regular stops at Stony the mornings of Sun., Tues., Thur. Sat. at 5 43.

It is expected the midnight train from the City will make stops at Stony.

The Confederation train has been discontinued.

General Motors v. Hy. Ford.

Edmonton Journal: There have been many sporting events this season to engross attention. But the biggest, the New York Times reminds us, has yet to be fought. It is that for the heavyweight national automobile championship between Henry Ford and General Motors. "Mr Tex Rickard himself," says the Times, "might pay tribute to the skill with which public interest has been whipped up for the imminent clash of the motors. Especially with regard to the challenger, the suspense is growing terrible. We hang on the fragmentary hints and the bold guesses that drift out from the Detroit training camp. What Mr Rickard will no doubt envy is the size of the audience, numbering presumably 115,000,000 people, in a stadium 3200 miles long by 1,500 miles wide."

The Equine Express.

An old-timer says he's seen a few tricks done with a motor vehicle, but the newest one, locally, is for a Ford to have a colt. Still, this was seen in Stony last week.

A short time ago an Inga farmer impounded an animal in Div. 1 pound, kept by Mr Sites. On advertising the animal, it was found the owner was a farmer from St Albert. On claiming it, at the pound, the problem of transportation arose, as Mike Cassidy, the owner, had nothing with him but his jitney; but, as a Ford has been known to carry almost everything else, why not a pony?

After a little preparatory work, he was loaded into the back seat, and the spectators on Main street were regaled with the sight of a horse's head peeping out from between the back curtains, as the caravan headed down Main street, on its way home to St. Albert.

Accident to Herb Stirling.

Mr Herbert L Stirling, a well-known resident of Stony Plain district, lies in the hospital at Consort, Alta, with both right leg ankle bones broken. He is doing fine, and getting splendid attention.

On Saturday, Sept. 17, he started out with four spirited binder horses attached to a democrat. He pulled to one side of the trail across the quarter-section prairie home pasture to let the horse's car go by. During the passing of the car one line became detached, and the horses became unmanageable and bolted. Herb stayed with the lines for three large circuits on the prairie, and as the horses were increasing their speed, he climbed out over the back of the rig and broke his ankle in the fall on the hard prairie.
